

First Quarter Moon

Journal

What Is First Quarter Moon?

This is when the moon looks like a half moon but is a quarter way through its monthly cycle.

We're in the waxing phase and the energy is building. Ideas and inspiration are flowing.

However, because of the hard angle of the sun and moon during first quarter, you may find you start to have some doubts about what you can achieve and manifest. A mini-crisis or problem might get in your way. Imposter syndrome peaks.

During this fortnight between new moon and full moon is the best time to take action on your goals.

Move forward. Make decisions. Be open. Say "yes!".
